

Group 3:

Luke Hagan (od8653)

Ruba Hagog (je8610)

Manuel Mendoza (ti7022)

Trung Lam (yg3892)

Lemarion Hall (qa1424)

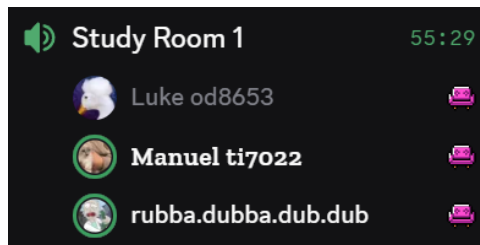

CS 401

Meeting Logs

MEETING 1 - 2/8/2026

Members present:

- Ruba Hagog
- Luke Hagan
- Manuel Mendoza

**Meeting Notes:**

- Discussed how to contact missing members and emailed the professor regarding the matter.
- Consider what type of game we'll be making and the specifications of the application. One of the applications we considered is making a UNO application.
- Talked about the professor's expectations and if an UNO game matches what is expected of us in the project. We talked about different options in games we could make other than UNO.
- Talked about what the application should do:
 - User is able to log in with a username and password
 - User can start a new game.
 - User can view their User ID.
 - User can view the cards that have been placed on the stack last.
 - User can see their cards but not the other user's cards.
 - User can select from their cards one card to put down when it is their turn.
 - User can see if it's their turn.
 - User can call UNO.

- Talked about different strengths that people have:
 - Ruba: Java, C++, Python and more backend programming
 - Luke: C++, Python, Javascript, HTML, CSS
 - Manuel: JavaScript, CSS, HTML. UI design, editing? (not sure if editing is related, but could help).

MEETING 2 - 2/9/2026

Members present:

- Luke Hagan (od8653)
- Ruba Hagog (je8610)
- Manuel Mendoza (ti7022)
- Trung Lam (yg3892)
- Lemarion Hall (qa1424)

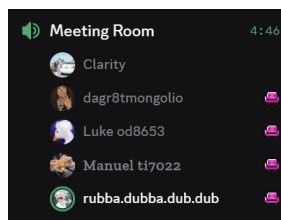

Meeting Notes:

- Took time to read over the presentation slides and talk about roles. Each member edited their slide with information on what their role will be and what they will be doing to fulfill their role.
- Read over the meeting proposal and edited it as needed
- Recorded the presentation for the Project- Phase 1 submission.

MEETING 3 - 2/16/2026

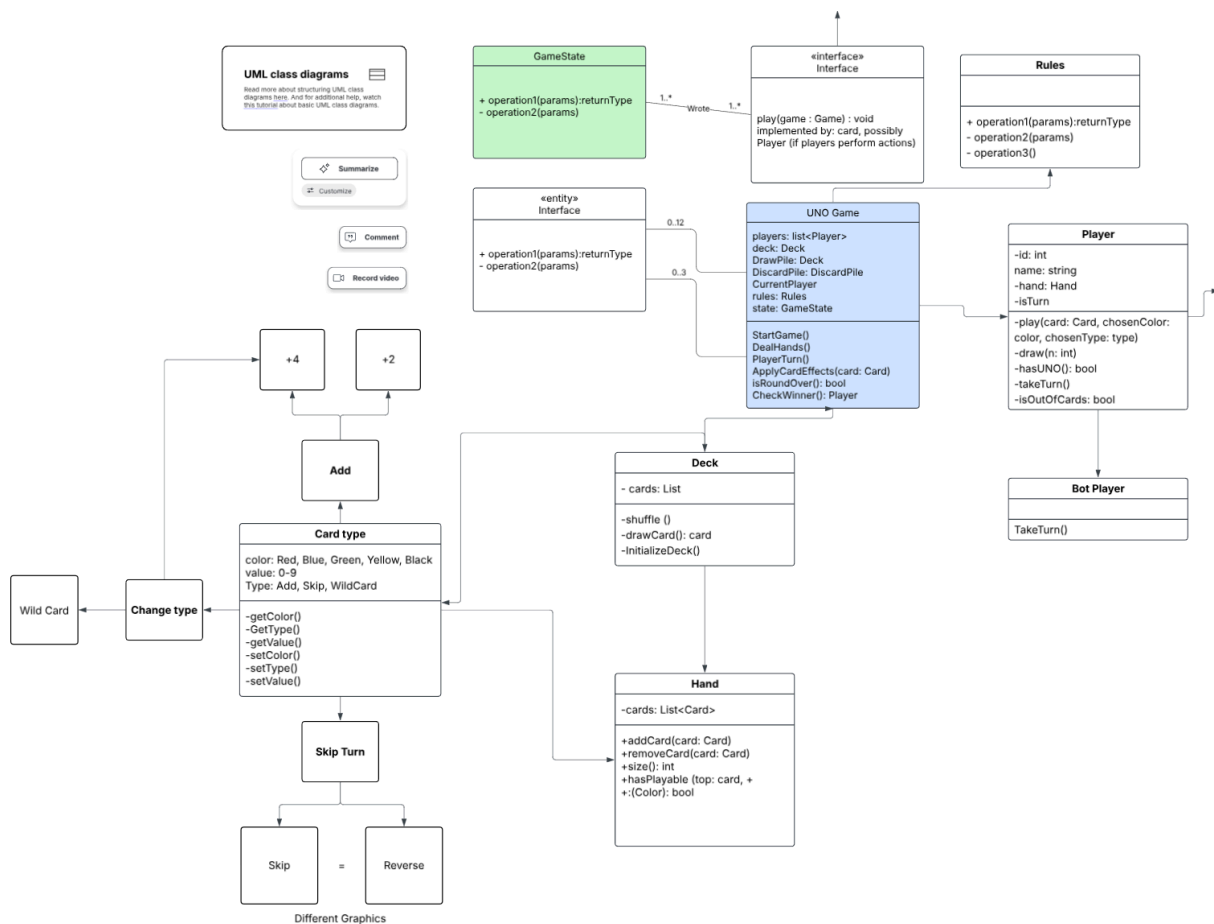

Members present:

- Luke Hagan (od8653)
- Ruba Hagog (je8610)
- Trung Lam (yg3892)
- Lemarion Hall (qa1424)

Meeting Notes:

- Talked about how the structure of the application
- Started working on the structure of the application using class diagrams through the application lucidcharts.
- The classes that we talked about:
 - Game Class
 - Player Class
 - Bot Player class
 - Deck
 - Drawing
 - Discard
 - Hand
 - Player_hand
 - Bot_hand
- We talked about different methods in each class. As an example in the player class there are different types of cards, their color, number and type. That would be an attribute of the class.

MEETING 4 - 3/15/2026

Members present:

- Luke Hagan (od8653)
- Ruba Hagog (je8610)
- Trung Lam (yg3892)
- Lemarion Hall (qa1424)

Meeting Notes:

- Manuel was absent due to connectivity issues.
- Each team presented what work they had done so far.
- Lamerion presented the code that he had worked on and explained the implementation of all of the classes he has done so far.
- Worked through some github issues.
- Trung was not able to add his work since he had not worked on anything yet.
- Agreed on another impromptu meeting Monday at 9:30PM

MEETING 5 - 3/16/2026

Members present:

- Luke Hagan (od8653)
- Ruba Hagog (je8610)
- Manuel Mendoza (ti7022)
- Trung Lam (yg3892)
- Lemarion Hall (qa1424)

Meeting Notes:

- Lamerion explained what each class he programmed does, and went into depth on some function that needed some more explaining.
- Trung uploaded files that he's been working on. Trung submitted files that are all Python files, his code will be changed to Java to match Lemarion's code before the next meeting on 3/25.
- Manuel shared the work he's been doing on the GUI, he used an application called figma in order to map out the initial parts of the GUI.
- All of the team submitted all their work on github in order to test out github as well as get a clearer understanding of what work needs to be done and what work has already been tackled.
- Manuel went over some p5 code that he had created in preparation for the end of the backend implementation phase. The code, as we decided, should remain the same

temporarily until we have a good solid implementation for all of our classes. Once that is done we will edit the code as needed.

MEETING 5 - 3/25/2026

Members present:

- Luke Hagan (od8653)
- Ruba Hagog (je8610)
- Trung Lam (yg3892)

Meeting Notes:

- Talked about the implementations of the classes that Luke had done in order to cover up for Trung's work.
- Trung never submitted the promised java file transformed into python and therefore lost privileges as a tech lead.
- The bot class was assigned to Lemarion
- Discussed how to connect the backend code to the frontend code that we have.
- Decided to first test the game using a driver just to make sure that it is running correctly, then later properly integrate the UI and backend.
